

## Series A2: - Differential Pressure Gauge

The Series A2 **differential pressure gauges** are **low cost**, diaphragm operated, **mechanical pressure gauges**.

The **A2 gauge** can be used in applications for measuring positive, negative, or **differential pressure** with an accuracy of 2%.

Standard applications include monitoring filter status, duct static pressure, room pressure, fan or blower pressure, paint booths, dust collectors, and cabinet purging along with many others.

Full Pressure Range (Pa), including Zero Centre Ranges available.

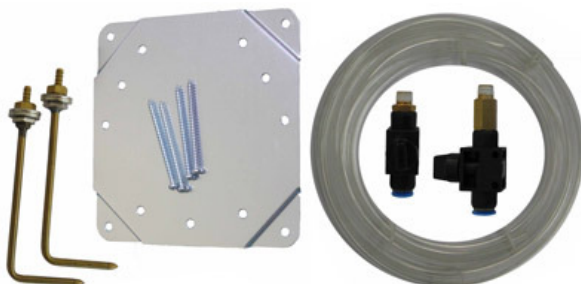

## Series A2: - Options & Accessories

### Adjustable Signal Flag (ASF)

For A2 Differential Pressure Gauges

The **ASF** is integral with the plastic gauge cover. Available for all A2 pressure ranges. Can be ordered with gauge (recommended) or separate.

### Air Filter Gauge Kit (A2-301-P)

For A2 Differential Pressure Gauges

The **Air Filter Gauge Kit** converts any A2 into an air filter gauge. The kit includes an aluminium surface mounting bracket with screws, (2) static pressure tips, (2) vent valves and (2) 5 ft lengths of vinyl (Plastic) tubing.

\* Aluminium tubing option (**A2-301-Alu**)
